How did you hear about Safe & Healthy Communities grant: Devon Employee

What is the title of the initiative or project you would like funding for?

Describe how your program/initiative will help in making your community safe and/or healthy:

Many of our outreach students (if not all) are both unfamiliar with how to communicate in a mature and responsible manner, and empathy. They come from varied backgrounds, but what is consistent is that they lack parental support and a safe home environment. Myself and a fellow teacher are in the process of developing a program where we hope to tackle their maturity deficits by breaking up boys and girls for weekly talking/activity sessions focused on improving their ability to communicate in a healthy manner (as opposed to the posturing and aggressive that is common to them), build empathy for their fellow students and the community, develop their self-confidence, improve their qualities as citizens, and, ultimately, prepare them for adulthood (and potentially parenthood as well). We want to deal with the gaps in their social skills so that they know how to respectfully communicate with others, and believe in themselves. In turn, our hope is that this will reduce the fighting between students in the community, reduce the rate of teen pregnancy and parenting, and allow our students to more easily move into the workforce and avoid getting into trouble with the law.

Will you need additional funding to complete this project? Yes
